Company: Leonardo

Location: Southampton

Category: computer-and-mathematical

Job Description:

The Leonardo Cyber Security Division is looking to recruit Senior DevSECOps Engineers to join its Bristol or London based engineering team with responsibility for providing a bridge between software development, testing, infrastructure, operations and system administrators to facilitate efficient, continuous and high-quality software delivery.

This is an excellent opportunity to join one of the UK's leading aerospace companies. To support you in this role, we offer our , having won the Best Flexible Working Policy Award, Best Flexible Benefits Strategy and Best Flexible Benefits Plan in 2023.

The processes and tooling implemented by the Software/DevSECOps Engineer team will enable source code and associated artefacts to be installed and configured across environments. The Software/DevSECOps Engineer will typically combine the skills of software coding and/or scripting and process reengineering with exemplary team working and communication skills. The Software/DevSECOps Engineer should have a good breadth of knowledge across the disciplines of software development and how software is deployed.

The ideal candidate will have demonstrable experience of performing a DevSECOps role, and preferably working in a secure environment. You will possess a strong all round technical ability with an excellent working knowledge of platform capability area for Cloud / Hybrid and on premise network and systems infrastructure technologies. An awareness of

cyber security capabilities is advantageous. You will need to have a good working knowledge of building, implementing and maintaining systems with complex architectures on client site, with on-going proactive operational support, working closely with key stakeholders and end users. Working within a specialist skilled engineering team providing 1st to 3rd line support to the client.

These roles demand excellent technical skills with the ability to support, maintain and operate systems while conforming to industry best practice and/or Leonardo best practices and technical designs. The role will require excellent team working attributes but also requires the ability to take responsibility and accountability for individual to work independently.

Projects will be from the full systems engineering lifecycle from Concept Exploration through to In-Service Support providing the opportunity to develop your experience while supporting the requirements management, system architecture and design, subsystem design and development, system integration, test and acceptance and specialist technical support. As a DevSECOps Engineer within the Cyber Division, you will typically be working as part of a larger team including the design, development and testing of secure systems, including but not limited to, Information Management Systems, Command and Control systems, Security Monitoring of IT, IoT and CNI systems and services.

These roles will have the ability to take ownership / implement the DevSECOps side of the engineering delivery of one or more work packages, including the planning, estimation, execution and progress reporting of own workload and that of other team members.

Assist in the overall implementation of new software / applications / packing for the Cyber division.

Analyse requirements, design, implement and unit test software code and supporting artefacts using appropriate tools.

As required, lead on software/application development activities.

Plan and undertake installations on development, test, reference and operational environments.

Deliver consistent high-quality software and environmental builds through automation.

Creation and maintenance of automaton frameworks for software and/or environment provisioning and ongoing operation.

Managing and controlling software configuration for projects including the source repository.

Implement and maintain of Continuous Integration (CI) and/or Build pipelines where appropriate.

Understand change control and release management practices.

Assist in data engineering activities (data cleansing, integration, onward data analytics).

Provide application support to existing deployed services.

Contribute to the improvement and efficiency of the Cyber division.

A good working knowledge and experience of various techniques with a broad scope of skills and experience of mainstream IT infrastructure services and components including:

Demonstrable experience of performing a similar role.

Good knowledge of Agile methodologies, SCRUM, BDD, TDD.

Source control management (Git, Azure DevSECOps etc).

O/S - Linux, Windows level scripting.

Automation tools for software and/or infrastructure builds PowerShell / Ansible etc). Clear and effective communication skills.

Strong analytical skills.

Aptitude for solving complex/technical problems.

Flexible and adaptable attitude, capable of acquiring new skills.

Objective and logical with an enquiring and creative mind

Microsoft - C#, .NET, SharePoint, SQL.

Data Engineering – experience of one or more: Apache ecosystem, SQL, Python.

Web - HTML, CSS, JavaScript, XML, SOAP.

Experience with Secure DevSECOps within an Agile /SAFe environment.

Containerisation - Docker, Kubernetes, Kubeflow etc.

Software development capability. Any form of prior development expertise would be beneficial, but the eagerness and desire to learn new technologies would be preferable.

Security Clearance

Life at Leonardo

With a company funded benefits package, a commitment to learning and development, and a flexible approach to working hours focused on the needs of both our employees and customers, a career with Leonardo has never offered as many opportunities or been more accessible to as many people.

Pension: Award winning pension scheme (up to 10% employer contribution)

Holidays: 25 days plus bank holidays, option to buy/sell leave and to accrue up to 12 additional flexi leave days per year

Flexible Working: Flexible hours with hybrid working options. For part time opportunities, please talk to us

Wellbeing: Employee Assistance Programme, access to Mental Health support, Financial wellbeing support, network groups (Enable, Pride, Equalise, Reservists, Carers)

Lifestyle: Discounted Gym membership, Cycle to work scheme

Company funded flexible benefits: Access to private healthcare, dental schemes, Workplace ISA, Go Green Car Scheme, technology and lifestyle options (£500 annual allowance)

Training: Free access to more than 4000 online courses via Coursera

Referral Incentive: You can earn a reward for successfully referring a friend or family member

Bonus: Scheme in place for all employees at management level and below
