

Senior Electronics Design Engineer

[Apply Now](#)

Company: Octagon Recruitment

Location: Livingston

Category: architecture-and-engineering

A market leading organisation based in Livingston, West Lothian are looking for a Senior Electronics Design Engineer to join a team developing electronics with a particular focus on ATEX/ IEC-Ex certified product development. Their products are used in markets ranging from Smart Metering, Oil & Gas, to Life Sciences and Medical.

The Senior Electronics Design Engineer will be involved with working on a broad range of technical projects where initial ideas are developed into real products in short timescales.

Key responsibilities of the Senior Electronics Design Engineer job:

Schematic capture, PCB design, analogue and digital system design

Microcontroller system design

Investigate, develop and utilise new technologies, components and techniques, processes and tools

Use analogue and digital electronics skills to design, build and test complex electronics modules

Key skills/experience required for the Senior Electronics Design Engineer job:

Proven experience developing electronic systems

Analogue and digital system design experience

Power supply design, high-speed design and wireless/RF experience would be an advantage

Experience of highly regulated development processes, e.g. medical devices, ATEX etc would be beneficial

This is a great opportunity for a Senior Electronics Design Engineer to work with a team of highly skilled engineers, developing lifesaving technology based in Livingston, West Lothian.

Apply now for the Senior Electronics Design Engineer job in Livingston, West Lothian.
