Company: Aventa

Location: United Kingdom

Category: architecture-and-engineering

Role Definition

Role and Main Responsibilities

A Xmas tree and IWOCS senior engineer is required to support Company worldwide offshore deepwater projects. He/she will be part of the project engineering group based in Basingstoke (UK) and will support all the engineering activities related to XT/IWOCS activities in the different phases of the project, from feasibility to Basic/FEED and along the execution phase for the several new upcoming or ongoing initiatives.

The main responsibilities and functions include but are not limited to:

Teamwork and collaboration with other colleagues in the Subsea Systems department, as well as with other disciplines.

Awareness of design standards requirements for Subsea Xmas Tree, Workover and Completion equipment, Tubing Hangers and Running Tools and other associated equipment and correct application of Company HSEQ policies.

Correct application of Company internal standards and HSEQ policies.

To act as Company representative for all activities related to Subsea Tree, Workover and Completion equipment, Tube Hangers and Running Tools and other associated equipment.

To prepare and complete large EPCI contracts for Offshore Projects for Subsea Xmas Tree, Workover and Completion equipment, Tubing Hangers and Running Tools and other

associated equipment in all project phases.

To ensure that the design of Subsea Xmas Tree, Workover and Completion equipment, Tubing Hangers and Running Tools and other associated equipment meets project requirements, applicable codes and standards and engineering best practices.

To prepare all related technical documentation during the different phases of the project.

To follow-up Supplier Call for Tender & Selection.

To review and approve FEED, Tender and Detailed Engineering performed by contractors.
