Company: Hypervine

Location: United Kingdom

Category: other-general

Position Title: Senior Environmental Analyst
Location: Flexible, with preference for proximity to major mining regions
Position Type: Full-time
Experience Required: At least 10 years of hands-on experience working directly within the mining industry. Demonstrated experience in creating carbon emission factors specifically tailored to the mining industry. Prior involvement in mining operations and a comprehensive understanding of mining processes.
Job Description: The Carbon Emission Analyst will be responsible for developing and refining carbon emission factors specific to the mining industry. This role requires a deep understanding of mining processes and their associated carbon footprints. The analyst will collaborate with various stakeholders to collect data, conduct analysis, and develop methodologies to accurately measure and assess carbon emissions across mining operations.
Key Responsibilities:
Carbon Emission Factor Development: Utilize industry expertise and data analysis skills to create accurate carbon emission factors tailored to different mining processes and activities.
Methodology Development: Design and implement methodologies for calculating carbon emissions from mining operations, ensuring alignment with industry standards and regulatory requirements.
Data Collection and Analysis: Collect, organize, and analyze data related to mining operations, including energy consumption, fuel usage, and emissions output, to inform carbon emission calculations.
Stakeholder Collaboration: Collaborate with internal teams, mining engineers, environmental specialists, and external partners to gather data, validate methodologies, and communicate findings.
Continuous Improvement: Stay abreast of advancements in carbon accounting methodologies, regulatory changes, and industry best practices to continuously refine emission factors and methodologies.
Reporting and

Documentation: Prepare clear and concise reports documenting carbon emission calculations, methodologies used, and recommendations for emission reduction strategies. Additional Information: This position offers an opportunity to play a pivotal role in driving sustainability initiatives within the mining industry. Travel to mining sites may be required periodically. Application Process: To apply, please submit your resume, along with a cover letter highlighting your relevant experience and expertise in carbon emission factor development within the mining industry. Grow with us We want to help you find work that matters to you and that you care about, in a high-growth environment. We offer all the benefits you would expect and we try to extend the same benefits to our international teammates. Benefits 28 days holiday in each complete calendar year inclusive of public and bank holidays. In addition to that you get your Birthday off First Aid training Coffee Fund Tree Planted for you
