Senior Equipment Engineer

Northampton – Must drive due to location

Highly Competitive salary plus incredible employee benefits

Responsibilities:

- Equipment improvements and upgrades and assistance with installations
- Working on MOVPE and associated equipment to minimize downtime during production to include phosphorous trap and gas cylinder changes using self-contained breathing apparatus SCBA (training will be provided, must be clean shaven).
- Fork lift truck driving (training will be provided).
- Oversee chemical, gases and spare parts control, chemical fills and waste management.
- Instruct and advise shift personnel in regard to procedure and solutions.
- Assist with logistic projects. E.g. equipment relocation, cleanroom reorganization, shipping, etc.
- Assist with shutdown activities. Some weekend overtime is required.
- Liaison with equipment and spares suppliers and specialist service providers (including the supervision of external contractors and field service engineers).
- Develop and deliver preventative maintenance strategies to maximise equipment utilisation and up-time.

To be considered for this position you will need the following:

- An HNC or Degree in an electrical/mechanical engineering discipline (or equivalent)
- 5 years of experience within, a manufacturing/engineering environment.
- Electrical qualifications such as BStH edition would be an advantage.
- Electrical engineering experience to include low and high voltage working.
- Basic understanding of pneumatic systems and the operation & use of PLCs.
- Ability to read and understand equipment wiring schematics.
- Familiar with the use of hazardous chemicals and gases.
- Previous experience with MOVPE reactors or any CVD/semiconductor equipment.
- Experience working within wet or dry exhaust gas abatement systems.
