Company: CloudOps

Location: United Kingdom

Category: architecture-and-engineering

About CloudOps CloudOps is a cloud consulting, managed services, and software company focused on open source, cloud native platforms, networking, and DevOps. Our purpose is to ensure our customers own their destiny in the cloud™; meaning that we help our customers leverage the flexibility of the cloud while reserving the right to change technologies and components, enabling freedom of navigation for our customers on their journey in the “cloudverse” so they can both achieve current goals and adapt to new business requirements over time. **What you can expect** At CloudOps we solve leading-edge technology challenges. We navigate the cloud ecosystem together with our customers - where the landscape, tools, and clouds will have you continuously growing and evolving your career. You'll get hands-on with the tech, enjoy the freedom to learn, and seize the opportunity to do fulfilling work. You'll work alongside an encouraging and dynamic team to teams that take their mission seriously and have fun along the way.**Who we're looking for**We are looking for motivated senior software developers to join our Products team. Your main focus will be to contribute to the advancement of our cutting-edge platform that enables service providers to bring to market a selection of products and cloud services under a unified umbrella. Our dev team is young, energetic and focused on using the best technologies and practices to solve our business goals. We have a flat organization where every member can make a difference and bring a unique point of view. This is a full-time position open to candidates across Canada. We are operating in a remote-first work culture and environment.

Our Tech / Productivity stack:

Java 11, Spring Boot, VueJS, Golang

MySQL, Redis, Elastic Stack, Apache Kafka

Docker, K8s

GitHub, Jenkins, IntelliJ

Slack, Google Apps, Jira

In this role, you will:

Develop Back-End applications using languages such as Java or Golang.

Develop Front-End applications using JS frameworks such as Vue.js.

Create and maintain test suites at various levels (unit, functional, automated or not).

Lead product architectural design and analysis of strategic areas of the platform.

Review code PRs (pull requests) to promote best practices and design guidelines.

Collaborate in cross-functional projects to support customer requirements gathering, unit and user acceptance testing.

Create and manage data schemas & content using the most appropriate database technologies.

Update and evolve CI/CD practices by applying industry best practices to prevent integration problems as well as ensure that the code is releasable at any point in time.

Lead in evaluation, benchmarking and documentation of various technical solutions.

Act as a point of contact with customers to ensure product developments are aligned with commitments.

Lead & oversee the creation of user stories.

Design visual mockups & user interactions on web interfaces.

Promote the use of best practices in Agile methodology and design for repeatability, usability, and testability.

Support, maintain and help document software functionality.

Actively participate in increasing the team's collective knowledge, by organizing or attending internal or external trainings.

Act as a mentor for more junior developers & interns.

Assist our operations team by providing occasional second-level support.

Lead ad-hoc task force when troubleshooting incidents with impact on production SLAs.

What we're looking for:

Minimum of 5 years of experience as software developer.

Excellent knowledge of Java.

Familiarity with Groovy and/or Golang.

Demonstrated skills in web-based development, including REST APIs and JS frameworks such as VueJS/Angular/React.

Experienced with diverse cloud platforms (AWS, Azure, GCP, CloudStack, OpenStack).

Experienced with SQL and NoSQL databases.

Experienced with CI/CD environments.

Familiar with container technologies (Docker, Kubernetes, Rancher, OpenShift).

Proficient in agile programming practices.

Strong analytical mind with a good dose of creativity.

Meticulous person who strives to constantly improve his/her/their competencies.

Excellent communication skills.

Nice-to-haves:

Has contributed to open source projects and can point us to his/her/their Github account.

Knowledge of advanced networking (e.g.: SDN, SD-WAN, NFV).

What we can offer you:

The opportunity to contribute to a meaningful purpose: solve leading-edge & cloud native technology challenges; navigate the cloud ecosystem with our customers, and do fulfilling work.

A team of trusting, curious, and supportive individuals that will contribute to evolving your career in the clouds.

A competitive compensation package, including an employee stock option plan and a comprehensive benefits plan.

Ongoing learning and training, with certifications.

Participation in open source and partner communities.

Work-life balance and a flexible schedule.

A remote-first workplace with a collaborative and friendly culture (including a weekly happy hour).

Over 15 years in business and internationally recognized leader in cloud computing.

Candidates will be asked to undergo a security screening, which includes a criminal record investigation, the results of which must be acceptable to CloudOps.
