

Senior Health Economists

[Apply Now](#)

Company: HEOR

Location: United Kingdom

Category: other-general

We are hiring experienced Senior Health Economists to join our health economics modelling team, a team of over 20 and growing. The seniors will report to a Principal Health Economist and take responsibility for managing HE projects including but not limited to the conceptualization, building, validation and reporting of a wide variety of economic models. Our modelling team are involved in projects which truly span the breadth of the drug development landscape including:

- o Early models
- o Budget impact and cost offset models
- o Complex disease models reflecting the lifetime impact of chronic conditions
- o Infectious disease and transmission models
- o Cost-effectiveness models for launch readiness and HTA
- o Value modelling for in-market assets
- o Payer facing value communication tools leveraging model output

At HEOR, you'll get to work with talented and curious people who solve the most complex decision problems for our clients. You'll join an environment that is set up to enable you and your team to be your best every day, supporting our clients in their goal to help patients to get timely access to new medicines and treatments that help them to live longer and healthier lives.

To find out more about our health economic modelling visit:

Continuous improvement and learning is a core part of our organisational culture and we are interested in speaking with experienced technical modellers to conceptualise, build and

disseminate a range of models.

Requirements

Whilst experience is important to us, so is aptitude. We are looking for people who are passionate about working for an innovative and people centric company, working together as one to achieve the same goal for our clients and for the patient.

Required skills and experience include:

Demonstrated expertise in conceptualising, developing, and delivering a range of mathematical and/or health economic models in Excel, VBA and other software packages

Experience in R and/or C++ is particularly desirable, but not essential

Strong statistical / quantitative analysis skills

Relevant working experience in healthcare, biotechnology and/or pharmaceutical industry with experience in consultancy beneficial

Experience in leading multi-functional teams on complex projects, including serving as key contact for clients

Excellent organizational skills including strong oral and written English communication skills

Strong interpersonal skills

Detail oriented with the ability to multi-task efficiently

Benefits

Competitive compensation and benefits package, including:

A 'learning' culture focused on personal development and supported by study bursaries

Workplace pension scheme

Private health insurance with AXA Health

Range of high street, supermarket, restaurant, gym membership, holiday and entertainment discounts via Sodexo

Cycle to work scheme

Employee assistance programme

Employees are given an additional day of leave for: their wedding and moving house

Annual leave purchase scheme of up to 10 additional days' leave per year

We offer remote working and hybrid working with offices located in Bicester, Oxfordshire and Cardiff, Wales.

If you would like to request any reasonable adjustment, for any part of the recruitment process (including application), please let us know by emailing careers@heor.co.uk
