

## Senior Human Factors Consultant

[Apply Now](#)

Company: National Nuclear Laboratory

Location: Cheshire

Category: architecture-and-engineering

### Summary

Job Description for Senior Human Factors Consultant:

This is where your skills play a critical role in keeping everyone safe. Working in Safety, Security & Safeguards gives you the chance to make your mark on some hugely interesting projects. NNL does work that nobody else in the sector is doing, and this means we need experts like you to make it possible, whilst keeping everyone safe. We're committed to using nuclear science to benefit society for years to come. This means that you can build a long and successful career here whilst playing a meaningful role in delivering cleaner energy, reducing waste and keeping colleagues and the public out of harm's way.

We are looking for enthusiastic, talented Senior Human Factors specialists who are experienced in integrating and applying Human Factors methods in a safety critical environment, advising and supporting the design and safety assessment process. We are looking for people who have a track record of successful technical leadership and delivery of projects, who can work as part of a team to deliver safety-based solutions and have the confidence to promote Human Factors best practice. NNL are at the forefront of nuclear research and development in the UK and beyond with a wide range of projects that require creative Human Factors support and we are looking for individuals who want to join our team and make a difference to these projects. There will also be an opportunity to apply and shape Human Factors practice in the nuclear industry and contribute to research in this area.

The team you will join is a dedicated, hard-working group who are passionate about the

work they do. We support working flexibly, can accommodate homeworking, and can be flexible about location, although some travel will be necessary, to support business needs. The location for this role is flexible and can be based at Sellafield, Preston, Risley or Workington.

### **Main Responsibilities**

Main Responsibilities for Senior Human Factors Consultant:

You can apply Human Factors methods in a wide variety of circumstances because you are up to date with developments in methodology and approach.

You can lead technical delivery of projects to meet customer requirements.

You are experienced in providing support to multi-disciplinary teams addressing safety challenges.

You are experienced in the support and development of junior colleagues.

You can manage and maintain relationships with internal and external stakeholders

You can provide support to bids for new work.

You will use your creativity and initiative to develop new capabilities for the Human Factors team, through innovative approaches that include being the technical lead on complex R&D projects and submissions.

You will be interested in developing the Human Factors team through mentoring and supervision.

You can design and deliver specialist Human Factors training within the team and across NNL.

### **Ideal Candidate**

Essential Criteria for Senior Human Factors Consultant:

Extensive experience in integrating and applying Human Factors methods, preferably in a safety critical environment.

Degree qualified or equivalent level of demonstrable technical capability.

Excellent level of knowledge in the field of Human Factors.

Proven ability to act independently, under own initiative, while supervising other members of the team.

Strong communication skills, including remote working.

Excellent teamworking skills, with ability to inspire the work of a team.

Ability to obtain SC level security clearance (this includes but is not limited to identity, employment, financial and criminal record checks plus 5 years' worth of UK residency).

Desirable Criteria for Senior Human Factors Consultant:

Detailed knowledge of advanced Human Factors techniques

Experienced in mentoring and developing technical skills.

Preferably Chartered Membership of a professional institution.

Excellent networking skills, maintaining network across the Human Factors field nationally.

You might have membership of relevant national industry group(s).

### **About The Company**

NNL is an incredible place to work. A place where people do things that have never been done before. A place where people push boundaries to further themselves, the business and society as a whole.

This is a place where personal and professional opportunities are limitless. If you want to change the world, if you want to tackle climate change, if you want to help advance medical science, if you want to help put things in space, if you want to answer the big questions, if you want to work with extraordinary materials, if you want to meet great people, learn new skills, challenge yourself, work flexibly, and build a long successful career with the power to make a real impact... you can do it all here.

NNL has a vision for Equality, Diversity and Inclusivity (ED&I) where NNL aims to be an inclusive workplace that attracts diverse talent through transparent and equal policies and procedures.

We want you and the diverse mix of people that we employ, customers that we service and stakeholders that we influence to feel valued. We encourage a workplace culture where everyone can thrive with a sense of belonging.
