Senior Infrastructure Engineer/4th Line £65,000 London | Permanent

My client is looking for a Senior Infrastructure Engineer to join the Infrastructure Architecture Team. You will administer the day to day operations of IT infrastructure operations and services. Work with the Architecture, Service Delivery and Service Desk Teams, and the wider Technology Department to effectively support and administer the full lifecycle of IT infrastructure operations, services, projects, and initiatives.

Essential Skills:

10+ years of Windows Active Directory and server administration

5+ years of Cisco routing and switching and Meraki wireless administration and operations

Office 365 administration and PowerShell scripting and automation

Cloud and virtual infrastructure – Azure, AWS, VMware environments

Advanced troubleshooting, root cause analysis and optimisation experience

Strong knowledge of VMware 6.5 or later

Experience of managing complex LAN, WAN infrastructure and data centre operations and exposure to SIEM operations

Administration of Checkpoint Gateways and Internet content filtering solutions.

Change management processes

Project management and delivery

Microsoft Windows Server 2012, 2016, or 2019 certifications

Excellent demand management, planning, organisation and prioritisation skills

Ability to undertake out of hours' work, during the evenings and at weekends.

Experience of ITIL environments and processes, preferably using ServiceNow
