Title: Senior Infrastructure Engineer Department: Procode IT Location: Remote /

Bournemouth Salary: £58,533 to £66,005 + 15% Bonus

Are you an experienced Infrastructure Engineer looking to expand on your Azure Cloud journey? If so, this may be the role for you! About us We are a dynamic software company. Established in 2006, with a vision of helping the energy and utilities sectors improve customer experience and lower their cost to serve, using smarter process automation. Do you get excited by the prospect of starting something new? Are you curious about what the future in tech holds? Do you have the drive to want to deliver great solutions for customers? Then we have an exciting opportunity as a Senior Infrastructure Engineer where we aim to provide you with a uniquely inclusive and diverse workplace, which showcases the extraordinary in all of us, by enabling you to be the best you can be. Our promise is to put customers at the heart of everything we do; it's part of how we live and breathe at Procode. Our hugely passionate workforce puts them at the heart of every decision we make. What does this role involve? In this role you will be responsible for the design and management of Procode's IT infrastructure and networks. You will ensure security, growth and availability are included in all design and project work undertaken for Cloud, Server, Switches, Firewalls and Storage deployments. The primary responsibilities will include developing, maintaining and continuously improving support on both internal and client-facing IT infrastructure. This will involve on premise and public cloud infrastructures including virtualisation, servers, storage, networks, and telecoms systems. You will review our current environments technical performance and availability, communicating the requirements and setting expectations to colleagues around the business, conducting

infrastructure design, feasibility and cost studies for solutions. You will undertake IT project tasks and be available to work out of standard hours to support on-call and weekend requirements as per Infrastructure Support rota. Who are we looking for? Your in-depth experience in the design and operational management of on-premise IT Infrastructure environments will be vital for success in this role. Your hands on experience Hyper-V, Windows and Linux operating systems, storage and networking, will allow you to be productive from day one. Your excellent interpersonal and customer-service skills will be valuable when communicating with stakeholders within the business. Your experience in implementing and supporting cloud infrastructure (Azure) will be highly advantageous to the team. To be successful in this role you will be required to pass an enhanced security vetting process. This role will involve on-call working on a 24/7 rota basis. Benefits - available from day one! Bonus Scheme, made up of personal and company elements. Career progression, we're an expanding organisation 25 days annual leave plus bank holidays. Pension scheme, Utilita contribution at 4% of your salary when you contribute 5%. The opportunity to win tickets to major outdoor events including, gigs and shows at arenas around the UK. Access for you and one other to our partnered Unmind App, where you can watch or listen to videos and podcasts or get hints and tips to understand and improve on your mental wellbeing. We offer all our staff a paid volunteering day every year. Plus the chance to be involved in various fund-raising opportunities. A health care scheme that includes dental, eye care, treatments, and diagnostics health consultations. Death in service, twice your annual salary. Employee Assistance Programme with access to counselling support, legal and financial advice 24/7 365 days a year, as well as a GP line and Your Care. The Luxion Group comprises of the following companies – Luxion Group Ltd, Utilita Energy Ltd, Luxion Sales Ltd, Utilita Field Services Ltd, Procode Technology Ltd and Canary Care Global Ltd.
