Company: Understanding Recruitment

Location: London Area

Category: other-general

Snr Java Software Engineer - Vehicle telematics/diagnostics - London (once per month) - £80K Join us in revolutionising the automotive industry with cutting-edge technology! We're thrilled to partner with our exceptional client for the second year, as they lead the charge in creating a groundbreaking platform aimed at preempting vehicle reliability issues. Leveraging in-house hardware and software, alongside direct connectivity with vehicle manufacturers, we're tackling the challenge of processing real-time data from modern vehicles head-on. We're currently seeking a Senior Java Software Engineer to join our dynamic data ingestion team, pivotal in expanding compatibility with global manufacturers. In this role, you'll be instrumental in shaping architecture, driving product direction, and developing new services from the ground up. Your expertise in Java, AWS, Kafka, Micronaut, and more will be central to refining existing platforms and integrating third-party inputs seamlessly. Requirements: Minimum 5 years of hands-on experience as a Software Engineer Proficiency in Java programming Experience in a fast-paced environment Extensive knowledge of Kafka Familiarity with public cloud platforms (GCP, AWS, Azure) In addition to the opportunity to work with cutting-edge technology, you'll enjoy the flexibility of remote work, with office visits required only once per month. We offer a competitive salary of £80K, with a generous bonus potential of up to 20%, along with a comprehensive benefits package. Don't miss your chance to make your mark in the automotive industry and be part of something truly innovative. Apply now to learn more!
