What are we looking for in our Senior Pension Implementation Analyst Scheme Events 10094123?

Our Scheme Benefits teams are looking for a number enthusiastic experienced pension professional to join our home-based team as a Senior Pensions Implementation Analyst.

The team sits within our Implementation Department whose responsibility it is to implement first class pension administration solutions for our new and existing clients. Our span of projects can range from large blue chip strategic transformational deliveries through to small bespoke client solutions. Working closely with other stakeholders our activities and skills are wide and varied.

Job Description:

As a Senior Pensions Implementation Analyst you will play a pivotal role in any implementation project as a subject matter You will be for reviewing work completed by and supporting our junior analysts.

You will be the technical go to person on the project, working closely alongside the data team to onboard data and the configuration team to automate calculations.

What you'll be doing:

Liaise with clients during the implementation cycle to understand their requirements, processes, systems and make recommendations on how to implement our product(s)/service(s)

Gather and interpret client requirements and processes, translate these into business solutions to support day to day administration

Own and be responsible for performing ad-hoc or unusual Implementation Scheme Benefits processes

Support and develop junior team members, and manage junior resource for specific tasks

Support the technical development of our technology platforms through participation in analysis and design, and specification production for new and/or enhanced developments

Feed into project management activities including risk and issue identification and mitigation

What we're looking for:

Great technical knowledge of defined benefit pension schemes and legislation

Experience with DB Pensions and/or employee benefits administration processes/software

Client Relationship skills with the ability to use appropriate communication methods with stakeholders

Experience of working in a project environment

Demonstrate the ability to analyse web requirement documents and identify impacts to Benefit products
