Company: MarkJames Search

Location: United Kingdom

Category: business-and-financial-operations

Job description

Senior Transmission Project Manager - £600-£650 per day (Inside IR35) 6-12 month contract

Our client, a large well-known energy company, are currently hiring for a Senior Project Manager to drive the project team in the development and delivery of projects across transmission providing leadership, co-ordination, and ownership of interfaces between multiple technical disciplines where required.

Responsibilities

Building and maintaining productive and enduring relationships with Contractors, Consultants, Stakeholders and Communities to support the sustainable delivery of the projects that you are responsible for.

Work closely with our engineers and managers to help ensure that engineering design risks are identified and mitigated to ensure appropriate measures are put in place for the pre-construction phase.

Prepare and co-ordinate design assurance reviews and the delivery of key project Gate documentation as per Large Capital Projects Governance.

Drive design maturity and delivery of scope to required quality and programme whilst ensuring all contractor deliverables are signed off accordingly.

Requirements

A minimum of 5 years Transmission Design Lead specific project experience, Civil or Line engineer.

Degree qualified at minimum in an engineering discipline.

Experience in transmission infrastructure.

Experience in substation construction, Line or Cable

This a hybrid working contract with the expectation to be in one of the Glasgow, Perth, Aberdeen or Inverness offices 2/3 days per week.
