Company: Propel London

Location: United Kingdom

Category: computer-and-mathematical

### Job Description

#### The Role

Following the hiring of a very impressive CTO, this business is hiring a senior engineer to join the team and play a key hands on role building a brand new platform in Python to process high amounts of data!

Reporting to the CTO you will play a key role in the evolution of this businesses product to deliver a product that continues to make massive progress in the market. You will play a key role in writing code but also have an impact on product roadmap and evolution. You will also help to set a strong engineering culture ensuring the best processes are adhered to.

In time you will also have the opportunity to lead a small team of engineers, mentoring them and allowing them to improve their careers

## About You

As a Senior Python Engineer for this high growth scale up you will have a number of skills that will enable you to do well at the job.

Deep experience with Python building systems that handle large Amounts of Data!

Experience with Cloud technologies.

Experience with Micro services.

A willingness to lead a small team.

As a senior python engineer for this high growth data provider you can earn in the region of £90k - £110k plus a range of impressive benefits. Full Remote
