Company: Understanding Recruitment

Location: United Kingdom

Category: other-general

Our partners are looking for a Senior Rust Engineer to help advance the scalability and latency of decentralised systems, by bringing web2 infrastructure to web3. They received over \$5m in Seed funding and had a successful Series A, taking the total to \$12m. In this Senior Rust Engineer role, you will: Build open-source software in Rust. Design a new blockchain infrastructure. Join an engineering team with expertise across blockchain protocols, distributed systems, cloud infrastructure, software security and cryptography. Be integral in setting the culture and the foundations of the company. To be a great fit for this Senior Rust Engineer role, you will have the following experience and understanding: Coding in Rust. System programming and functional programming. Writing clean code, automated tests and documentation. Understand the importance of quality and security in web3 projects. Worked in small teams and take ownership of your work. If you are a Senior Rust Engineer and want to develop a revolutionary blockchain infrastructure, APPLY NOW!
