Located in + countries.

POSITION DESCRIPTION OVERVIEW

The Senior Project Systems role is a key and influencing role within the NTT DATA Business Solutions Digital Core Practice. The successful candidate will be part of a wider team responsible for the design and implementation of SAP solutions to our customer base and to meet our customer's needs. As a Senior Expert you will support customer engagements and perform delivery of Project Systems solutions working alongside Solution Architects, Project Managers and the Integration Team to deliver innovative and high-quality solutions integrated into core S4/ECC and non-SAP solutions.

Responsibilities and Expectations

Support Solution Architects to work closely with customers and NTT DATA Business Solutions sales and business development teams to assist in the translation of business requirements into a solution that takes advantage of Project Systems capabilities supporting the architecting of these areas within the overall solution landscape. This will include collaboratively compiling statements of works to support any stage of the sales and deal review processes. Leads and co-ordinates integrated workshops with detail and complexity with Senior Stakeholders in the customer business.

Provide thought leadership to NTT DATA Business Solutions and its customers focused on Supply Chain strategy specifically in Project Systems solutions and the road map within these areas;

Act as the design authority on the projects ensuring the quality and integrity of Project Systems solutions being implemented is aligned to industry best practice

Adhering to the agreed NDBS strategy, engage in self-directed and other learning to keep pace with new technologies and developments to ensure NTT DATA Business Solutions remains at the forefront of the market within which we operate. Share, use and communicate expert knowledge in order to develop others and make business processes more effective.

Recognise potential for repeat and extended business with respect to end-to-end service offer by NTT DATA Business Solutions and provide comprehensive input. Support NTT DATA Business Solutions to grow our business by being alert to the customer opportunities that present themselves.

Have strength and depth in delivery and configuration expertise in the overall possibilities for

Project Systems process flows.

PERSONAL PROFILE - SKILLS AND COMPETENCIES

Is able to communicate, influence, convince and inspire effectively by own personality and act as a trusted role model and advisor within Project Systems solution architecture field of expertise.

Proven and demonstrable track record of successfully delivering customer projects and providing Project Systems solutions for the resolution of complex requirements.

Strong interpersonal and soft skills, able to quickly develop relationships with all stakeholders; within NTT DATA Business Solutions locally and globally, external customers, suppliers and partners to become a trusted advisor in your of field of expertise.

Demonstrates gravitas and personal integrity, is able to overcome unforeseen situations and keeps business objectives in mind. Drives results, effects, convinces and inspires by his/her personality, behaviour and communication style. Is a role model and ambassador.

Makes solid and reliable decisions in complex environments.

Has a thirst for learning and staying on top of the evolving technology landscape. Actively shares and transfers own expertise and operational knowledge in a structured method, thus making it useful and functional.

PERSONAL PROFILE – EXPERIENCE

The successful candidate will be able to demonstrate more than years of professional experience working within an SAP environment with at least 6 years in the Project Systems consulting area. Experience working with a value-added re-seller or software house would be advantageous;

Proven and demonstrable experience in solution design and architecture with successful delivery and experience of all elements of more than 5 full project lifecycles, covering at least some of the following areas with associated functionality;

Investment Projects (w/ Investment Management)

Project Stock

Made-to-Order / Engineer-to-Order

Internal Projects (e.g. Internal Resources)

Timesheets

Experience in any of the following SAP Project Systems solutions or add-ons would be desirable (but not essential), but it will be expected that the successful candidate has (at least) an overview of SAP's wider offering within these areas which goes beyond SAP ECC / S/4 Hana core functionality;

Project and Portfolio Management (PPM)

Commercial Project Management (CPM)

SAP S/4 Hana Public Cloud Professional Service

SAP Cloud for Projects;

Integration with 3rd party Project application (e.g. Primavera)

A good working knowledge of cross functional processes in relation to Project Systems is desirable (e.g. in FICO, SD, MM, PP).

A secondary skillset in an associated module will also be desirable.

GENERAL

Career opportunities exist along multiple route maps from people and leadership, products and expertise and project management. Which route you take is up to you and we are on hand to provide guidance and support. Join us to start the journey that is your career path;

You will be expected to follow relevant policies, procedures and work instructions, and report to the appropriate superior if objectives cannot be met or a problem occurs, the resolution of which is outside the scope of your authority;
