

Senior Security Engineer

[Apply Now](#)

Company: Link Group

Location: United Kingdom

Category: computer-and-mathematical

Overview

As a Senior Security Engineer for Link Group you will be part of the Global Security Architecture and Engineering team, helping to drive the Cybersecurity team and the business in current information security challenges across security technology control assessment, design, configuration, integration, documentation and support.

This role is based from our Leeds city centre office on a hybrid working approach; working from home with a fortnightly office presence. As team members and colleagues are based in our APAC region, it's likely that you will be required to participate in out of standard hours calls on a weekly basis.

What you'll be doing:

Create and maintain global standards, ensuring a consistent security approach

Design and implement solutions to ensure that they deliver business objectives securely

Uplift, drive and deliver security capabilities within the group

Act as a technical point of escalation related to security controls and concepts

Deliver security solution designs and implementation direction in a fast-paced environment solutions

Evaluate, architect, implement, and support security tools and services for Link Group rapidly emerging Cloud based hosting model and help execute the global Information Security strategy / Centre of Excellence

Lead technical change for cybersecurity best practice adoption within projects

Develop security solutions architecture aligned to organisational strategy and industry best practice

Provide guidance to key stakeholders on best practice architecture practices

Maintaining awareness of security trends and the global threat landscape

Advance security computing knowledge & understanding (including cloud security) across the wider organisation

Continue to develop subject matter expertise in designated area of specialisation. This includes performing research and keeping abreast of trends and best practice techniques and controls

Provide leadership and mentorship to junior team members including knowledge transfer

Demonstrate 'by example' professional and ethical behaviour by ensuring compliance with external legislation, internal operating policies, and procedures relevant to the position

Policy and configuration review, approval and implementation of changes to DLP, WAF, DAM, endpoint, and other security products

What we're looking for:

Strong understanding of Application Security concepts and best practices including agile methodologies and coding languages

Experience in DevSecOps transformation

Experience in Security Operations, Security Engineer or similar technical role

Experience with successful and unsuccessful project implementations

Knowledge of integration concepts, patterns and technologies

Extensive experience across infrastructure domains (network, compute and storage)

Experience across Cloud and infrastructure components (server, storage, network, data, and applications) to deliver end to end Cloud Infrastructure architectures and designs.
Azure experience preferred.

Experience performing threat modelling and value assessment techniques to assess controls and provide architectural decisions

Experience working with Cloud Security, Cyber security (Malware, penetration testing, forensics, incident response), endpoint Security, Security Incident and Event management, Data Protection, network Security, Identity & Access Management

Ability to identify critical & high priority issues and resolve and/or escalate where required

Assist project teams with technical decisions and implementation

Experience in architecting, designing, and building Security Architecture Frameworks

Experience in a hands-on implementation capacity on major projects

Experience implementing medium to large-scale distributed applications

You have strong skills in Zscaler, CASB, OKTA, Office 365 and Active Directory, Azure AD, Citrix Azure (Cloud) and other Microsoft technologies

You have a working knowledge of Agile and Product Centric principles, product management, scheduling and a strong customer focus

Strong communication, consulting, and negotiation skills

CISM, SSCP, CCSP, CRISC is not essential but highly desirable
