Senior Software Engineer, Frontend (Europe)

Apply Now

Company: Memorisely

Location: United Kingdom

Category: computer-and-mathematical

is a virtual learning campus on a mission to make learning Product Design accessible and enjoyable. Our Live coding and UX/UI Design Bootcamp help designers and developers around the world learn the latest skills in a micro class. With our mission to make learning accessible, we're building an on-demand web application with micro classes for designers and devs to learn anywhere, anytime.

We're hiring a Frontend Software Engineer to join our Product Team to help us build our with the latest web technologies: AWS, Next.js, Tailwind, Clerk, Stripe.

Location: Remote (Europe Timezone)

Full-time

Requirements

As a Frontend Software Engineer, you'll...

Build features on a product team enabling visually developed asynchronous workflows

Write performant and accessible UI components (Next.js)

Collaborate with software engineers, product managers, and product designers in a supportive team environment

Build and maintain unit and integration tests (Cypress)

Mentor other engineers on best practices, code design considerations, and quality

Improve our planning, development, and deployment processes to help you and your fellow team members

Unite our front and back-end services

When you're not contributing to our product team, you'll collaborate with our education team to create curriculums for developers to learn the latest front and back-end skills. We think it's a pretty cool role that has you building and sharing your knowledge. That said, these role responsibilities are just the start! At Memorisely, we encourage you to contribute wherever your interests take you — and shape your role accordingly.

About you

You'll thrive as a Software Engineer at Memorisely if you:

Have previous engineering experience in scalable, multi-tenant environments that drive rich front-end experiences.

Have developed a scalable SaaS product or service that builds customer trust through accessible and reliable user experiences

Value testing and documentation as much as you do code

Are comfortable with ambiguity and scoping solutions with your teammates

Have consistently communicated trade-offs throughout a project to meet both technical and business requirements

Get excited about encouraging and developing earlier-career engineers

Comfortable sharing your knowledge of coding and experience in educating your team

A brilliant communicator and love sharing good energy with your team

No stress if you don't meet 100% of the responsibilities listed. We'd still love to read your application and get to know you during interviews.

Benefits

Life is busy and we ensure you work the hours that fit your lifestyle

Full remote role and we encourage travel

The compensation range for this role is **45,000 to 60,000 Euros** annually,

Work with a super friendly team around the world

30 days holiday

Annual company meet-up somewhere amazing around the world

Join community meetups to meet amazing designers and devs around the world
