

# United Kingdom Jobs Expertini®

## Senior Software Engineer

[Apply Now](#)

Company: SailPoint

Location: United Kingdom

Category: computer-and-mathematical

### **About SailPoint:**

SailPoint is the leader in identity security for the cloud enterprise. Our identity security solutions secure and enable thousands of companies worldwide, giving our customers unmatched visibility into the entirety of their digital workforce, ensuring workers have the right access to do their job – no more, no less.

Built on a foundation of AI and ML, our Identity Security Cloud Platform, Atlas delivers the right level of access to the right identities and resources at the right time—matching the scale, velocity, and changing needs of today's cloud-oriented, modern enterprise.

### **About the team:**

You'll be joining the newly formed Privilege team, initially helping them build the core of a new product offering—the backend services to enable our Identity Security Cloud Platform to interact with a wider range of corporate systems and infrastructure devices.

The team is fully remote, UK-based, and, as a small team, you will be a key contributor.

### **The role:**

In a typical day you'll be working in Golang or Python to deliver on the vision for the new product. In bridging a cloud-based SaaS offering with corporate infrastructure devices, there'll be a mix of developing microservices in the cloud and containerised services running on Virtual Appliances within customers' networks.

There are some interesting constraints, for example we want to ensure that customer-owned, privileged credentials are only available in plaintext within a customer-controlled environment, and this requires careful use of cryptography.

In 90 days, you'd be on-boarded and landing work in collaboration with the tech lead.

In 6 months, you'd be operating with a high degree of autonomy to deliver on the team goals.

In 1 year, you'd be a Subject Matter Expert able to run projects as the team grows.

### **Responsibilities:**

Deliver efficient, maintainable, robust Golang/Python based features.

Produce designs and rough estimates, and implement features based on product requirements.

Collaborate with peers on designs, code reviews, and testing.

Produce unit and end-to-end tests to ensure code quality.

### **Experience/requirements:**

Golang - expertise including concurrency, goroutines & channels

Python - expertise including packaging & managing dependencies e.g. with Pyinstaller

Testing & Debugging - unit & integration tests, including strategies for exercising external integrations; familiarity with debug & performance profiling tools

Containerisation & container orchestration - Docker, Kubernetes

CI/CD pipelines – CloudBees/Jenkins

Infrastructure as Code - Terraform

AWS

Microservices & SaaS

BSc in Computer Science or similar or equivalent work experience

Preferred: 5+ years of experience

SailPoint is an equal opportunity employer and we welcome everyone to our team. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, or veteran status.
