

Senior Structural Engineer[977633]

[Apply Now](#)

Company: Nicholas O'Dwyer

Location: United Kingdom

Category: architecture-and-engineering

We are based in Ireland but also work in the UK, Europe, Africa, Asia, and the Middle East. We are part of the RSK Group, a group of more than 175 companies with over 11,000 employees operating around the globe, and are one of the leading engineering and environmental science companies in the world.

About the Role:

The Senior Structural Engineer will be available to attend meetings etc. with travel between sites and clients as required and will also attend regular coordination meetings with the design team.

The ideal candidate would be a Chartered, or near-chartered, Engineer with a minimum of 7+ years of experience in the design and management of structural engineering projects. You should be an effective communicator and be practiced in the delivery of client-facing roles where an emphasis on responsive service, program focus, and quality of design are paramount. The coordination of internal and external design resources, either individually or in teams, is also an essential part of this role.

The successful candidate would be working as part of a team on International and domestic projects including:

Portfolio of Design and Build projects in the UK.

Commercial development projects in Northern Ireland

Design Services for UK and Ireland water utilities

Core role requirements:

Lead and manage structural engineering projects, ensuring compliance with industry standards, project requirements, and client requirements.

Conduct structural analyses and calculations to design safe and efficient structures.

Oversee the preparation of detailed design drawings, specifications, and reports.

Collaborate with multidisciplinary teams and clients to deliver projects within established timelines and budgets.

Provide technical expertise and mentorship to junior engineers and team members.

Actively engage in site inspections, assessments, and structural surveys.

Stay informed about advancements in structural engineering practices and standards to enhance project outcomes.

Participate in project meetings and liaise with stakeholders to address technical concerns and ensure project alignment with objectives.

Uphold a high standard of work, ensuring all designs and engineering solutions meet the company's quality requirements.

Qualifications and Experience: -

Bachelor's degree in Civil/Structural Engineering or a related field. Master's degree is a plus.

Chartered Engineer status or actively working towards chartered status.

Minimum of 7 years of relevant experience in structural engineering.

Proficient in structural design software (e.g., Tekla Structural Designer, Tedds, Robot, Masterseries Retaining Wall Suite, etc.).

Strong knowledge of relevant design codes and standards (e.g., Eurocodes, British Standards).

Excellent project management and leadership skills.

Effective communication and interpersonal skills, both written and verbal.

Ability to work collaboratively in a team environment.
