

Senior Structural Engineer

[Apply Now](#)

Company: Calibre Search

Location: United Kingdom

Category: architecture-and-engineering

Description

We are currently working with a bright, progressive and highly successful structural and civil design practice based in Farringdon, as they look to add a Senior Structural Engineer to their team which is growing organically and sustainably.

You will be part of a team that works in a professional manner, applying your skills effectively and competently. Their approach is one of working pro-actively and enthusiastically with colleagues both internally and from external organisations. You will adopt an ethic of 'team-working'.

As a Senior Structural Engineer you will be representative of the culture and approach to work communicated by the Directors through the Business Policies and Vision and Values.

The practice has signed the IStructE Engineers declaration on the climate and biodiversity emergency that will assist in strengthening their working practices to create structural and civil engineering outcomes that have a more positive impact on the world around us by adopting the IStructE guidance on their approach to design.

The key purpose of this role is to manage a team of engineers to deliver innovative structural engineering designs on all projects and other activities that meets and surpasses the expectations of the Director(s), architects, and clients in relation to: innovative, sustainable and intelligent design; fee and client budgetary constraints; and project programme/inhouse time-based targets.

As a Senior Engineer, you will have achieved Chartered status with the Institution of Structural Engineers.

Your core responsibilities will include:

Design of structures to appropriate Statutory Requirements and guidance from relevant Codes of

Practice, Technical Notes, etc.

Preparation of appropriate documents, calculations, specifications and sketches in line with the company

Procedural Manuals suitable for all stages of the project from concept to Building Control submission and approval.

Liaise with BIM Technicians where appropriate to enable them to prepare suitable drawings for the relevant stage of the project.

Where you are the designated Project Engineer, monitor progress of the design against programme.

Carry out building surveys under instruction from a Director or Associate.

Attend meetings where appropriate.

Visit site to evaluate constraints on and/or progress of construction and that the constructed work reflect the design intent on the drawings.

Prepare suitable Reports in a timely manner.

Provide guidance and support to Graduate and Project Engineers.

Carry out data searches where relevant to a project.

Attend training or technical seminars where considered beneficial

Company benefits include a rewarding project portfolio with several major clients, hybrid workign arrangements, a company laptop and iPhone, increasing leave, maternity and paternity with service, your birthday off, regular socials, as well as clearly defined progression.

This is a unique opportunity that is not to be missed. If you think your experience matches up well, please click apply or reach out to Jamie Will at Calibre Search.

Calibre Search promote equality in the workplace and we welcome applications from all suitably skilled or qualified candidates regardless of their sex, race, disability, religion/beliefs, sexual orientation or age. We act as both an employment agency and employment business.
