

Senior Technical Program Manager

[Apply Now](#)

Company: Microsoft

Location: United Kingdom

Category: arts-design-entertainment-sports-and-media

Overview

Microsoft's Cloud Operations + Innovation (CO+I) is the engine that powers our cloud services. We deliver the core infrastructure and foundational technologies for Microsoft, from Azure to AI. Our infrastructure is comprised of a large global portfolio of hundreds of data centers, managed by a team of subject matter experts working to support services for more than 1 billion customers and 20 million businesses in over 90 countries worldwide.

The Region Design and Technology team is at the forefront of designing and driving regional launch, expansion, and evolution. Our global team works with a broad range of disciplines to craft and implement design principals and the newest technologies. As a Senior Technical Program Manager on the EMEA Region Design team, you will be responsible for creating long term designs for the launch of new Cloud Regions in our EMEA Region (Europe, Middle East & Africa), expansion of our existing regions, and implementation of new technologies and requirements into the regions. To create optimal designs, you will partner with multiple engineering groups (both physical and software), finance, land, energy, and network teams to ensure we meet our customer requirements, design principals, and financial targets. Once the design is completed, you will be responsible for getting alignment and approval of the region design across multiple disciplines both inside and outside of CO+I. Once a plan is in execution, you will proactively monitor the region for risk to the design and engage cross-functional teams for resolution.

Microsoft's mission is to empower every person and every organization on the planet to achieve more. As employees we come together with a growth mindset, innovate to empower

others, and collaborate

to realize our shared goals. Each day we build on our values of respect, integrity, and accountability to create a culture of inclusion where everyone can thrive at work and beyond.

In alignment with our Microsoft values, we are committed to cultivating an inclusive work environment for all employees to positively impact our culture every day.

Qualifications

Required Qualifications:

Bachelor's Degree in Electrical/Mechanical/Industrial Engineering AND experience in engineering, data analysis, or product development OR equivalent experience

Experience in cross functional program management, especially in a strategy, planning and decision-making environment

Experience working with physical infrastructure in some capacity.

Experience in data and analysis for decision making

Ability to meet Microsoft, customer and/or government security screening requirements are required for this role. These requirements include but are not limited to the following specialized security screenings: Microsoft Cloud Background Check: This position will be required to pass the Microsoft Cloud background check upon hire/transfer and every two years thereafter.

Preferred Qualifications

Bachelor's Level Degree in Electrical/Mechanical/Industrial Engineering

In-depth knowledge of Microsoft's regional datacenter and network architecture

Experience in planning cloud specific infrastructure

Experience in demonstrated experience leading and managing a business-critical function

Ability to communicate and present complex analysis at the executive levels for alignment and decision making

Excellent communication and leadership skills to drive projects, and build buy-in and support

Responsibilities

Partners with infrastructure teams to create Region Designs for new AI & Azure Regions and

for expansion of existing Regions.

Implements the latest principals and technologies into Region Designs.

Directly shape the strategy for delivery of Microsoft cloud capabilities and growth throughout live and forthcoming Regions throughout EMEA.

Proactively monitors regions for risk in executing designs. Collaborates across the organization for resolution.

Leads and coordinates cross-functional team efforts to drive engineering solutions to technical challenges and deliver quality solutions to committed schedules and project plans.

Creates relationships to drive orchestration and integration efforts to implement design principals and technologies. Collaborates and coordinates across organizations to ensure approval and alignment of Region designs.

Translates the needs of the organization and other teams into region design principals and region designs based on data-focused analysis. Engages in active risk management (proactive and reactive) to identify risks and propose mitigations.

Benefits/perks listed below may vary depending on the nature of your employment with Microsoft and the country where you work. Industry leading healthcare
Educational resources
Discounts on products and services
Savings and investments
Maternity and paternity leave
Generous time away
Giving programs
Opportunities to network and connect
