Senior Test Engineer

Location: Sherburn in Elmet – North Yorkshire

Permanent

This vacancy presents a brilliant opportunity for a Senior Test Engineer to join a forward-thinking organisation who are a global leader in the design, development, and manufacturing of electric vehicles and is offering a competitive salary and benefits package.

Our client is a multiple award-winning Automotive Manufacturer who is at the forefront of Electric Vehicle technology and dedicated to a sustainable future. It is a very exciting time to join this growing company who are looking for someone to be part of their exciting journey.

Senior Test Engineer role:

Lead assigned Whole Vehicle Testing activities.

Support the leadership of the Durability and Robustness Attribute

Collate component, system and vehicle-level test requirements.

Work closely with the Vehicle Engineering team to develop test plans looking for efficiencies wherever possible.

Support the creation of Whole Vehicle Test requirements and maintenance of standards.

Participate in benchmarking of company and competitor vehicles to support the competitiveness of vehicle durability and attribute levels.

Assess vehicles throughout development, including Virtual Series and physical testing to ensure durability and robustness attribute is on target.

Support the implementation and development of Engineering robustness, target achievement and evaluation activities.

Perform virtual and physical analysis to evaluate vehicle Durability and Robustness performance and ensure target achievement through to production.

Work with the Prototype Build and Workshop team to ensure that vehicles are appropriately prepared for testing, including necessary instrumentation and maintained to a safe standard.

Execute teardown activities as part of testing, such as post-corrosion or durability testing.

Coordinate and maintain spares and consumables requirements for Whole Vehicle Testing

Support bucks and rigs where appropriate (directly linked to Whole Vehicle Testing)

Create and check sign-off reports for the Whole Vehicle Test team before approval and release by the Principal Engineer

Senior Test Engineer Requirements:

Degree level education in an engineering field such as Automotive, Mechanical or Electrical.

Experience in whole vehicle testing, management, test procedure development and reporting.

A high level of technical competence should be displayed in this role, including the ability to take engineering data and present a high-level summary.

Excellent attention to detail.

Possess a can-do & do it right first-time mindset.

Ability to generate and present technical material concisely to suit the audience.

Ability to work independently with minimal supervision.

We're looking to speak with suitable **Senior Test Engineer** candidates as soon as possible.

Apply now with a copy of your CV to discuss this position with a member of our team.
