

## Site Manager

[Apply Now](#)

Company: Barhale

Location: East of England

Category: architecture-and-engineering

Here within Anglian Water, we collaborate with a number of alliance partners to provide the best water and water recycling services across the region by maintaining our existing assets and undertaking new projects to safeguard future water supplies.

Playing a key part in our drive to bring environmental and social prosperity to the region we serve through our commitment to Love Every Drop is our Integrated Operational Solutions (IOS) Alliance. Comprising Anglian Water, Morrison Utility Services, Barhale and Kier, the IOS Alliance works together to concentrate on solutions across the water recycling and clean water asset base, typically totalling £50-60m per year.

With hundreds of projects across the region and the need to deliver customer satisfaction within the water industry at the highest it has ever been, how we manage and execute projects has never been under as much scrutiny as now.

To ensure water projects across the area are managed successfully from inception to completion, ensuring Health & Safety standards and time frames are met, we are looking for a Site Manager to join the team!

What you will be doing?

Based on a designated site in the area, you'll be responsible for the day-to-day

management of Supervisors, delivery teams and sub-contractors on site. You'll look to ensure resources are utilised correctly to ensure efficiency is achieved and we optimise our workforce to meet deadlines.

Furthermore, you'll be expected to implement and monitor health, safety, quality and performance standards and ensure all work meets required water industry regulations and Anglian Water-approved standards including POSWSH.

Responsibilities:

Accountable for SHEQ performance of Projects, including undertaking and recording findings of periodic SHEQ visits

Responsible for all Health and Safety issues on site, completion of paperwork, including weekly safety & environmental inspections, toolbox talks, site-specific risk assessments & method statements

Act as a Health & Safety ambassador across the organisation by driving cultural change into the Delivery/Design Teams to eliminate/minimise physical and non-physical waste – i.e., recycling techniques, workshop recharges, standing time etc.

Oversee the management of multiple concurrent projects by proactively managing site-based Supervisors and Delivery Teams ensuring safety, quality and time frames drive performance

Responsible for delivery of projects in line with tender allowances and agreed programmes of work, actively managing any slippage

Proactively support planning responsibilities to ensure initiatives are implemented with minimal disruption, these include resourcing, project requirements and estimations

Procurement of plant, materials and specialist subcontractors using an appropriate financial management accounting system to ensure projects are delivered within tender allowances  
A little bit about your skills, experience, and behaviours....

Knowledge and Experience in the water industry

To have a certificate in Site Safety Management (or attended a 5-day course)

To hold relevant CSCS card

Extensive experience in M&E/construction industry

Have knowledge and experience of working to a budget and programme

Commercial and Contractual awareness.

Ability to minimise cost and maximise value during project construction phases.

Effective management of sub-contractors.

Excellent customer and client relationship skills

Ability to influence client decision-making.

Basic Management training, skills & experience

Good understanding of legislative and corporate SHEQ / Industry / Legal requirements

Comprehensive IT abilities including MS Suite.

Good Project/programme management skillsYour strong communication skills will allow you to build strong relationships across the organisation and influence and challenge where appropriate.

While you understand the need to deliver projects to the right standards and on time, you'll never compromise safety and ensure it is at the heart of everything we do
