

Software Architect

[Apply Now](#)

Company: Venn Group

Location: United Kingdom

Category: computer-and-mathematical

Our client, a global organisation, urgently require an experienced Software Architect to undertake a long term contract.

In order to be successful, you will have the following experience:

Successful delivery of software architecture to control complex distributed networked systems

Knowledge / Experience of software architecture in at least one of the following areas: RF telecommunications, waveforms, OSI model, SIGINT, EW

Driving the implementation of Agile development methodologies

C, C++, Python and Database architecture

SC Cleared

Within this role, you will be responsible for:

Delivering software input into a variety of tendering opportunities

Mobilising and maintaining software development teams to deliver against the requirements of successfully bid opportunities

Acting as Product owner for software delivered into in-service projects, R&D and the wider campaigns

Providing guidance to the team on focus and priorities across the portfolio

Understanding and reporting on software delivery timescales and risk across a software portfolio

Developing and maintaining software architecture for our software solutions

Working closely with the System Architect and Programme technical lead to integrate software solutions into the wider system architecture

Driving agile delivery within the focus area software delivery activities

Ensuring that all stakeholders including management and technical staff are clear of the design, architecture and how software will be delivered

A Software Architect with experience of delivering significant software bids and building and leading software development teams to meet requirements

This represents an excellent opportunity to secure a long term contract within a high profile organisation.
