

Software Engineer I

[Apply Now](#)

Company: Confluent, Inc

Location: United Kingdom

Category: computer-and-mathematical

Description

Position at Confluent Europe Ltd. Confluent is pioneering a fundamentally new category of data infrastructure focused on data in motion. Have you ever found a new favourite series on Netflix, picked up groceries curbside at Walmart, or paid for something using Square? That's the power of data in motion in action—giving organisations instant access to the massive amounts of data that is constantly flowing throughout their business. At Confluent, we're building the foundational platform for this new paradigm of data infrastructure. Our cloud-native offering is designed to be the intelligent connective tissue enabling real-time data, from multiple sources, to constantly stream across the organisation. With Confluent, organisations can create a central nervous system to innovate and win in a digital-first world. We're looking for self-motivated team members who crave a challenge and feel energised to roll up their sleeves and help realise Confluent's enormous potential. Chart your own path and take healthy risks as we solve big problems together. We value having diverse teams and want you to grow as we grow—whether you're just starting out in your career or managing a large team, you'll be amazed at the magnitude of your impact. **About the Role**We are looking for a Frontend Software Engineer to join our awesome UI Foundations team. In your day to day, you will get your hands into deployment infrastructure, contribute to our Design System, improve our public documentation, and monitor and improve UI performance, among many other challenges. UI Foundations provides engineers at Confluent with the processes, tools, technologies, and guidance necessary to give our customers a consistent and exceptional UI experience. As a Frontend Software Engineer, you will be responsible for creating

the fundamental blocks and providing 10x impact to the frontend of Confluent Cloud. **About**

Our Stack:

Our Cloud UI stack is written in Typescript and built based on React.

The UI connects to multiple REST and GraphQL APIs.

We unit test our code with Jest.

We deploy the UI to production every day, with the ability to test each and every commit in production (even PRs) before it goes live.

Feature flags unblock us from coordinating releases with backend teams

Bots keep all of our dependencies up to date

Who You Are:

Smart, humble, and empathetic

Have a strong sense of teamwork and put team's and company's interests first

Driven and excited about the challenges of a fast-paced, innovative software startup environment

Interested in topics such as design systems, accessibility, and efficiency in frontend workflows

What We're Looking For

At least 1+ year of professional experience

Bachelor's degree or higher in Computer Science or similar field or equivalent

Experience building client-side web applications for data-intensive applications

Excellent understanding of modern JavaScript, typing in JS, HTML5, and CSS

Experience with React/Flux (or equivalent), modern JavaScript tooling/Webpack/Babel

Strong foundation in algorithms and application design

Experience with writing/monitoring/managing large-scale system deployments

Come As You Are At Confluent, equality is a core tenet of our culture. We are committed

to building an inclusive global team that represents a variety of backgrounds, perspectives, beliefs, and experiences. The more diverse we are, the richer our community and the broader our impact. Employment decisions are made on the basis of job-related criteria without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, veteran status, or any other classification protected by applicable law. Click to review our Candidate Privacy Notice which describes how and when Confluent, Inc., and its group companies, collects, uses, and shares certain personal information of California job applicants and prospective employees. #LI-Remote
