Software Engineer - Prototype

Apply Now

Company: IOHK

Location: United Kingdom

Category: computer-and-mathematical

Summary

We are looking for a talented Prototype Engineer, to join our innovation team and help shape the future of IOG products and technology.

As a prototype engineer, you will be looking at developing prototype, model, simulators, at the edge between engineering and research. You will work closely with various stakeholders (architect, cryptographer, researcher, engineer) to help and shape innovation projects.

Duties

Design & develop systems from just ideas on paper.

Present options and solutions at team and project meetings

Ongoing communication reflecting your project status on a periodic basis

Requirements

Key Competencies

Proficiency in various programming languages and functional paradigms

Knowledge of the rust programming language

Deep understanding of computer science fundamentals, including algorithms, data structures, and concurrency

Knowledge of blockchain technology and its core concepts, such as consensus mechanisms, cryptography, and smart contracts

Self motivating and self learner

Experience

At least 3 years of experience in software development

Strong understanding of computer science fundamentals, including algorithms and data structures

Experience with blockchain technology is necessary

Experience in remote work and collaboration across different time zones.

Experience in prototyping and developing ideas

Benefits

Flexible schedule

Remote work

Laptop reimbursement

New starter package to buy hardware essentials (headphones, monitor, etc)

Learning & Development opportunities

Competitive PTO

Medical Benefits

At IOG, we value diversity and always treat all employees and job applicants based on merit, qualifications, competence, and talent. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
