Position Overview:

We are seeking a talented Software Engineer (SRE) who is passionate about AWS, Spring, Microservices, Architecture and DevOps, this is the perfect opportunity for you.

As a Software Engineer (SRE), you will play a pivotal role in architecting, implementing, and maintaining our cloud infrastructure and microservices-based applications. Your expertise in AWS, Spring, and DevOps practices will drive efficiency and scalability, ensuring our technology solutions remain cutting-edge.

Key Responsibilities:

Design, build, and maintain our AWS-based cloud infrastructure to ensure high availability, scalability, and security.

Collaborate closely with development teams to implement CI/CD pipelines and automate deployment processes.

Manage and optimise microservices architecture for performance and reliability.

Troubleshoot and resolve infrastructure and application issues, ensuring minimal downtime.

Implement best practices for monitoring, logging, and alerting.

Stay up-to-date with emerging technologies and industry trends to drive continuous improvement.

Work closely with cross-functional teams to optimise system architecture for maximum efficiency.

Qualifications:

Proven experience as a Software Engineer (SRE) in a cloud environment, with a strong focus on AWS.

Expertise in microservices architecture and Spring framework.

Proficiency in scripting and automation (e.g., Python, Bash).

Experience with containerisation and orchestration tools (e.g., Docker, Kubernetes).

Strong understanding of infrastructure as code (IaC) principles (e.g., Terraform, CloudFormation).

Familiarity with CI/CD tools (e.g., Jenkins, Travis CI).

Excellent problem-solving and communication skills.
