Company: Opus Recruitment Solutions

Location: United Kingdom

Category: business-and-financial-operations

I am working with a Financial Services Tech Company who are building an innovative trading platform. Very well funded and building a very unique product with a customer base already in place! They are looking for a Software Engineer (3+ years of experience) to join the team and help build their unique platform. The role will lean towards the backend and focus on C# .Net, SQL & Azure - It will also include React.js on the frontend. Depending on your experience will depend on the amount of frontend you do but will lean towards the .Net side of the stack. They are looking for at least 3 years commercial experience working as a Software Engineer with a passion for technology & drive to grow! A MSc or BSc in a relevant field is also required. Paying up to £55,000 for the right candidate. Have an office in London (if you're nearby to come in) OR can be fully remote with the odd visit. Just placed a Frontend Engineer in the team, sounds like a very exciting time to join! Lots of greenfield work and a chance to build something very unique.
