Job description

Overview

A number of our clients are growing rapidly and looking for passionate, innovative professionals across Software Engineering to join their multi-disciplined team. You'll work in a collaborative and inclusive environment that values diverse perspectives and continuous learning. Experience across all levels of technical capabilities will be considered from Junior - Principal / Lead expertise within the below area;

Bristol UK

Herfordshire, UK

Software Engineering: You will own the delivery of your software from requirements through development and into production from a technical and project perspective. In this role, you will participate in all aspects of a challenging development program including requirements elicitation, architecture, design, implementation, and test of complex solutions

involving HW, SW and FPGA.

You will have:

· Full life-cycle software development experience.

· Recent experience using C, or C++ , C# or ADA in embedded applications.

· Sound understanding of operating system concepts such as multi-threading, process scheduling, inter-process communication, memory management and I/O would be desirable.

· Sound understanding of Object-Oriented Design (OOD) and programming skills / bash, python or similar would be desirable.

· Solid C++ programming experience (including the Standard Template Library) on Linux and/or Windows platforms would be advantageous

Important: Due to the nature of the role, all candidates will need to be prepared to Security Clearance and this will be SC OR DV level depending on the client.

Site Location: All applicants must be located locally, or able to relocate to the client sites.

(Relocation assistance available *T&C's apply)

Working: Flexible working and some Hybrid working potentials.
