

Software Engineer

[Apply Now](#)

Company: Navartis

Location: United Kingdom

Category: computer-and-mathematical

Responsibilities

Enhance and extend agent-based model simulations for improved derived products.

Develop scalable and efficient software solutions leveraging cloud infrastructure for performance optimisation and resource management.

Collaborate with cross-functional teams to define objectives for data science innovation projects with support from senior colleagues.

Communicate project updates, outcomes, and learnings effectively across various channels and audience levels.

Maintain existing C# software applications, including bug fixing and adding new functionality.

Develop Windows desktop engineering software to support manufacturing projects and assist existing customers.

Collaborate with the development team to analyse requirements and design software solutions, adhering to industry best practices.

Software Engineer Requirements:

Experienced Software Engineer proficient in Python with 2+ years of coding in C/C++ and Python.

Strong understanding of CI/CD tools, test suite development, and conducting code reviews.

Proficient in Git for collaborative work, with effective communication skills for engaging stakeholders.

Hands-on experience in developing SaaS solutions on AWS, including EC2, Lambda, S3, and RDS.

Skilled in object-oriented programming, algorithms, data structures, and software design patterns.

Familiarity with front-end technologies like HTML, CSS, JavaScript, and frameworks/libraries like Angular or React.

Ability to troubleshoot and debug effectively in a fast-paced, agile environment.
