Tech Lead - .Net C# React and Azure – LiverpoolWanting to have the chance to be a part of taking lead of a pure greenfield development team? Are you wanting to always keep up to date on new Tech?Currently, we are working with an upcoming financial company who are based in Liverpool. They are currently looking for a Lead Software developer to join their team where you'll be a part of their Greenfield Division. Over the last couple of years, they have revamped their technology department and are finally in the last stages of removing their legacy systems. Which is crazy!Whiles they are looking for a Lead Software developer to join the team they are wanting someone who is passionate about modern coding patterns and standards within software development and helping out other developers when needed. As you'll be coming into the business, you'll become more responsible of taking more of a lead on certain key projects and providing new solutions.Tech stack you'll be working on is .Net, .Net Core, Microservices, Azure, Azure DevOps and Docker.This would be a perfect opportunity for a Lead Developer who is looking to purely develop backend applications through continuous improvement and also to keep up to date on the newest technology coming out!If you would like to find out more about this opportunity and would like to work within their greenfield division, then this is a role is perfect for you.Lead Software DeveloperLiverpool-based – 3 day a week
