Company: Annapurna

Location: London Area

Category: other-general

We are a leading Software as a Service (SaaS) provider, specializing in delivering innovative cloud-based solutions to the financial sector. Our mission is to revolutionize financial technology through cutting-edge software and unparalleled customer service. We are at the forefront of digital transformation in finance, and we're looking for a talented Cloud Solution Architect to join our dynamic team. What we are looking for... We are seeking a skilled Cloud Solution Architect with expertise in both Azure and AWS cloud platforms.

The ideal candidate will have a proven track record of designing and implementing robust, scalable, and secure cloud solutions tailored to the unique needs of SaaS applications in the financial sector. This role requires a deep understanding of cloud architecture principles, as well as hands-on experience with both Azure and AWS services. What you will do.. Collaborate with product teams to understand the requirements of our SaaS applications in the financial sector and translate them into scalable cloud solutions. Design end-to-end architectures for cloud-based SaaS applications, considering factors such as multi-tenancy, performance, scalability, reliability, security, and cost optimization. Develop architectural diagrams, documentation, and presentations to communicate proposed solutions to internal stakeholders and clients. Work closely with development teams to provide guidance on best practices for cloud-native application development and implementation. Conduct proof-of-concept projects and technical feasibility assessments to evaluate new cloud technologies and services. Provide expertise and guidance on cloud migration strategies for SaaS applications in the financial sector, ensuring minimal disruption to customers. Ensure compliance with industry standards and best practices for cloud security, data privacy, and

regulatory requirements, particularly in the context of SaaS offerings in finance. Collaborate with cross-functional teams, including product management, engineering, and operations, to ensure successful implementation and deployment of cloud solutions. What we are looking for.. Bachelor's degree in Computer Science, Information Technology, or related field (or equivalent experience). Minimum of 8 years of experience in a similar role, with a focus on cloud architecture and design for SaaS applications in the financial sector. Strong proficiency in both Azure and AWS cloud platforms, including hands-on experience with a wide range of services (compute, storage, networking, databases, etc.). Experience designing and implementing highly available, scalable, and multi-tenant architectures for SaaS applications. Solid understanding of cloud security principles and best practices, including identity and access management, encryption, and network security in a SaaS context within the financial sector. Excellent communication and interpersonal skills, with the ability to effectively communicate technical concepts to non-technical stakeholders. Strong problem-solving skills and attention to detail, with a focus on delivering high-quality solutions that meet the unique requirements of SaaS applications in finance. Relevant certifications (e.g., AWS Certified Solutions Architect, Microsoft Certified: Azure Solutions Architect) are a plus.
