

Sr Automation Tester - 6 month contract

[Apply Now](#)

Company: PayMate

Location: United Kingdom

Category: computer-and-mathematical

Position: Senior Automation Tester

Experience: 8-10 years

Location: Your Location

Role Overview:

As a Senior Automation Tester you'll be the maestro orchestrating the seamless integration of automated testing into our development processes. Your experience is not just a number; it's a testament to your ability to create harmonious testing frameworks ensuring the quality of our software products.

Key Responsibilities:

Develop and implement automated testing strategies, frameworks, and solutions.

Collaborate with cross-functional teams to understand project requirements and design efficient and effective test plans.

Create, maintain, and execute automated test scripts for web, mobile, and API applications.

Identify and troubleshoot software defects, providing detailed information to the development team.

Mentor and guide junior team members, sharing your knowledge and expertise.

Stay abreast of industry best practices, tools, and technologies to continuously improve testing processes.

Collaborate with stakeholders to enhance test automation coverage and efficiency.

Requirements:

8 to 10 years of proven experience in automation testing.

Proficiency in programming languages such as Java

Expertise in automation testing tools such as Selenium Appium and RestAssured

Strong understanding of software development life cycle (SDLC) and agile methodologies.

Experience with continuous integration/continuous deployment (CI/CD) pipelines.

Excellent communication and collaboration skills.

Leadership qualities with a passion for mentoring and knowledge sharing.

automation testing framework, java, selenium, appium, software development lifecycle
