Company: Holt Engineering

Location: Burton, Dorset

Category: architecture-and-engineering

Steel Erector

Steel Erector Salary: £15 - £17.50 ph

### The Company

A leading provider of high-quality steel structures, with a portfolio that includes industrial buildings, aircraft hangars, warehouses, grandstands, multi-storey buildings, car parks, bridges, defense equipment, roller shutter doors, windows, and curtain walling.

### Steel Erector Overview

As a Steel Erector/Cladder, you will play a crucial role in construction projects, working alongside a skilled team to erect steel structures of all sizes and complexities.

### Steel Erector Role & Responsibilities

Adhere to all company health, safety, and environmental policies, ensuring that every task is executed safely following established guidelines and risk assessments.

Accurately read and interpret technical drawings, applying safe preassembly and erection techniques for structural steelwork at both low and high elevations.

Sling loads and are comfortable with signalling and working seamlessly with cranes to ensure efficient and safe material handling.

Work at heights and operate high-level access equipment, such as Mobile Operating Platforms (MEWPs), with precision and adherence to safety protocols.

Erect steelwork with unwavering attention to detail, ensuring structural integrity and alignment with project specifications.

Skillfully fit prefabricated sheet metal components, including flashings, trims, and structural decking, ensuring proper installation and adherence to project specifications.

Install roof, vertical, and horizontal cladding systems with precision and attention to detail, ensuring weatherproofing and aesthetic integrity.
