### Key skills required for this role

Project Manager , Structure's , PRINCE2 qualification

### Important

Project Manager required on a long term contract basis...

### Job description

The Project Manager will be responsible for managing and facilitating the delivery of 5 complex infrastructure/Structures highway maintenance projects as part of a 4-year strategic asset management plan. The ideal candidate should have a recognised project management qualification. The role may evolve over time beyond the initial projects.

If you have experience in structural engineering, highway maintenance, and bridge construction, and possess the necessary project management skills, this could be a great opportunity for you to contribute to the development of key infrastructure projects.

### Key Responsibilities:

Manage and facilitate the delivery of 5 complex infrastructure/Structures highway maintenance projects

Ensure projects are delivered on time, within budget, and in line with quality standards

Coordinate with stakeholders to ensure smooth project execution

Monitor project progress and identify any risks or issues

Provide regular updates and reports to senior management

Implement project management best practices

Support the team in delivering successful outcomes

Contribute to the continuous improvement of project management processes

**Job Requirements:**

Experience in structural engineering, highway maintenance, and bridge construction

Knowledge of project management methodologies, with PRINCE2 certification preferred

Strong organisational and planning skills

Excellent communication and interpersonal abilities

Ability to multitask and prioritize effectively

Analytical mindset and problem-solving skills

Attention to detail and ability to work under pressure

Flexibility to adapt to changing project requirements
