

System Engineer

[Apply Now](#)

Company: CHEP

Location: England

Category: other-general

The role will provide expertise to all our Software based systems across multiple plant operations and sites in the UK&I. These will include PLCs (Rockwell – (AB) structure, Factory Managements system – (SCADA), Local Networks, and software network devices such as our tracking and digital scanning infrastructure. The Systems Engineer will provide site support across the 26 operations in UK&I and help deliver improvements in Safety, Quality and Cost. Key Accountabilities are: Ensure the highest level of safety is maintained at each service centre by providing oversight and expertise in the areas of functional machinery safety. Ensure sites are audit ready. Ensure all electrical standards are followed and revised. Ensure all best practice and improvements to standards are captured through change request process. Project and plant support in Integration technologies. Network security. Ensure critical spares are available through efficient spare parts management. Part of new plant handover package. Ensure PLC backups are in place. Develop Plant PLC / Network Documentation. Experience and Skills: Experience in software experience within a manufacturing or industrial environment. Professional Engineering Qualification HNC or Degree level. Software / Electronics C&Q or NVQ at level 3. Programmable Logic control qualification – preferred ABLAN working knowledge. Ideally you'll have a Machinery Safety Qualification – (Machine Safety Expert / NEBOSH). Ideally, Multiskilled Engineering qualification.
