## Systems Engineer

[Apply Now](#)

Company: QuEST Global Services Pte. Ltd

Location: United Kingdom

Category: computer-and-mathematical

Quest Global is an organization at the forefront of innovation and one of the world's fastest growing engineering services firms with deep domain knowledge and recognized expertise in the top OEMs across seven industries. We are a twenty-five-year-old company on a journey to becoming a centenary one, driven by aspiration, hunger and humility.

We are looking for humble geniuses, who believe that engineering has the potential to make the impossible, possible; innovators, who are not only inspired by technology and innovation, but also perpetually driven to design, develop, and test as a trusted partner for Fortune 500 customers.

As a team of remarkably diverse engineers, we recognize that what we are really engineering is a brighter future for us all. If you want to contribute to meaningful work and be part of an organization that truly believes when you win, we all win, and when you fail, we all learn, then we're eager to hear from you.

The achievers and courageous challenge-crushers we seek, have the following characteristics and skills:

The function is seeking experienced systems engineers (Left hand side) with a sound understanding of the development lifecycle and product lifecycle (Breathe of knowledge within the complete V lifecycle).

### **Engineers will be able demonstrate:**

Systems Thinking (context, complexity)

Systems Design (concept Generation, Architectural Design, Design Integrity)

Systems Safety (mitigations & hazards)

The ability to identify system risks and opportunities

System relationships (interfaces)

IVVQ planning & Execution (Requirements Sell off)

This role within Customer would be delivered by a Senior Engineer about to converge on Principle or a Principle Engineer. A trusted Engineer. Self-driven, able to work alone or as a team without the need for coaching / mentoring.

Accountable for self, proactive, collaborative and able to communicate effectively.

The Engineers will be given work packages to pick up & deliver for the projects they will be assigned too.

The Engineers will be deployed within projects / teams.

The Engineer will be producing Artefacts in relation to their work.

Work packages will consist of reviewing customer User Requirements Documents (URD) & Interpretating & documenting customer requirements.

- o Creating baselines, version controlling baselines.

Identifying configuration solutions

- o Reviewing change requests and communicating impact

Developing system solutions to achieve requirements for:

- o Hardware, Software and or Systems of Systems

Breaking down Hardware, Software requirements, to product the appropriate level (product building block, building block assembly and or building block)

- o The Engineer will be able to identify, propose and achieve solution buy off for URD requirements.

The Engineer will:

- o Create solutions individually or take accountability in leading teams to create system solutions.

- o Will be experienced and proven in the derivation of requirements.

- o Manage requirements through DOORS.

The Engineer must meet the below requirements:

- (1) Security requirements.
- (2) Site requirements.
- (3) Demonstrable Experience, able to derive requirements from URD's in to sub system allocation.
- (4) Possess submarine domain experience (even better if SONAR) / Defence Maritime experience.
- (5) Have full breathe and knowledge within the complete V lifecycle.
- (6) DOORS experience or equivalent.
- (7) Be self-sufficient and self-starter able to lead small teams.
