

## Technical Account Manager - Vulnerability Management

[Apply Now](#)

Company: NCC Group

Location: United Kingdom

Category: other-general

### The Opportunity

This is an exciting opportunity to join a dynamic security solutions team in which you will be responsible for the vulnerability management and delivery of client security programmes. As part of an ever-growing delivery team, you must have a passion for IT security as well as a desire to deliver a high-quality service to our client base.

As a member of the team, you will be expected to be fully comfortable with operating Windows and Linux systems, have a solid knowledge of networking and cloud security concepts, and be passionate about IT security. As part of the Vulnerability Management delivery team, you will be responsible for looking after existing clients scanning programmes, managing their on-going scanning needs, validating results and supporting them with remediation advice.

### The Challenge

This is an opportunity to work in a fun and challenging environment, using market leading security testing tools and platforms to provide security testing services to our large client base. You will play a key role in delivering and managing client security programmes all year round, as well as building relationships with clients and ensuring that our services are meeting their needs. You will also be given every opportunity to help shape the direction of the service as well as assist with the development of the service.

Setting up security programmes based on customer requirements

Running network and application vulnerability scans

Manually verifying all vulnerabilities identified in scans

Writing and delivering client reports

Work directly with customers on troublesome vulnerability issues

Providing support and answering queries from clients

Attending support meetings as part of a vulnerability management program of works

### **Essential Skills**

Very good understanding and experience of common Linux and Windows operating systems

Proven understanding and exposure to network security

Proven understanding of cloud security concepts

Practical experience using vulnerability management scanning tools and utilities, such as Nexpose Rapid 7, Tenable Nessus, Burp, NMAP etc

Practical experience using cloud vulnerability management tools and utilities, such as AWS Inspector, GCP Security Command Center, Tenable, Qualys, Rapid 7

Understanding and exposure to Vulnerability Management aggregator platforms such as Vulncan.io, Splunk, Prism.

Good interpersonal and communication skills.

Ability to work and manage time and tasks independently.

Pro active approach to solving customer challenges around Vulnerability Management.

Strong customer management skills.

Minimum of 2 years in a security-related role.

### **Desirable competencies:**

Degree in Computer Science / Engineering or equivalent experience

Understanding of cloud services, architecture, and technologies

CPSA or higher qualifications desirable but not essential

UK Security Check (SC) clearance is desirable but not essential

At NCC Group we are passionate about passionate people; someone who wants to join in our mission of making the world safer and more secure, whilst learning new skills and advancing their career forward.

Please do not hesitate to apply.

### **About NCC Group**

The NCC Group family has over 2,000 members located all around the world, providing a trusted advisory service to 15,000 customers. Born in the UK, we now have offices in North America, Canada, Europe, Asia- Pacific and United Arab Emirates.

We are passionate about helping our customers to protect their brand, value and reputation against the ever-evolving threat landscape. We fuel that passion with investment in our people and our business.
