## Heating Technical Surveyor- Renewable Energy Company - 40K plus van

Are you a qualified Heating Engineer looking for a new opportunity?

Do you want to work with a first class business that specialises in energy efficiency?

Are you happy to travel throughout Scotland?

CBW have a new opportunity for a Heating Engineer to carry out Air Source Heat Pump & Full Central Heating System surveys throughout Scotland. Candidate's will ideally have experience in Renewable Energy including knowledge of Heat Pump Design & Installation, further training will be provided to the successful applicant.

### Duties and responsibilities

Surveying domestic properties to enable a comprehensive plan for heating installations to be generated whilst ensuring the customer is aware of all installation requirements.

Liaising with office staff to ensure adequate resource and materials are in place for successful installations.

Job will entail an element of commissioning and setting-up heating systems as well as

fault finding and remedial works as the role develops.

Using in house software to assist with calculating Heat Loss & Pipe Runs within properties.

Attend meetings/toolbox talks when required.

Commitment to the use of best practice, continuous improvement and service excellence.

Ensuring all photographic and paperwork requirements are completed for each job.

Any other duties as may be specified from time to time.

## **Essential**

Previous experience in central heating installations, a minimum of 5 years is required.

Ability to interpret technical surveys for material orders/additional works.

A valid Disclosure Scotland Certificate.

Fantastic customer and client communication skills with effective verbal skills.

Gas Safe Qualified.

The ability to be flexible in hours and days of work, dependent on business needs and travel/work away from home as required.

The ability to communicate effectively with office team to ensure seamless progression from survey to installation.

A willingness to develop knowledge and skill base to reflect developing market.

## **Desirable**

Experience of Renewables and Air Source Heat Pump Installations.

Knowledge of the various funding routes for heating replacements within the industry.

Experience of using electronic devices to record survey & installation evidence.

Strong understanding of the product ranges available across the industry.
