Technology Architect

116124BR

Job Description

**Role - Lead Architect**

**Location - London, UK**

### **Job description / role expectations.**

In the role of Lead Technology Architect, you will interface with key stakeholders and apply your technical proficiency across different hybrid cloud platforms – software defined datacentres, private cloud, public cloud architecture, hybrid cloud / multi-cloud management platforms, enterprise observability and automation platforms. You will play an important role in interacting with business and application teams and translate functional / application requirements to infrastructure architecture, and high-level design artifacts. You will also do technical feasibility and identify smart ways of completing client's requirement. You will have strong techno-commercial acumen and analytical skills to weight various architecture / technology considerations to recommend a suitable options and business case for the Clients. You will guide the team technically and work closely with offshore team acting as a communication medium between the client and offshore. You will be part of a learning culture, where teamwork and collaboration are encouraged, excellence is rewarded, and

diversity is respected and valued.

## **Required**

- Must possess experience as an enterprise architect for a completed - large-scale project
- Strong understanding of Hybrid Cloud infrastructure and architecture with some mid-level knowledge around different workload types and their characteristics
- Must have undertaken the role of Technology Architect in a few projects
- Must have experience of architectures involving system planning, networking, operating systems, cloud, backup & archival, EMS, RPO/RTO management
- Must have experience of at least two projects involving transformation & migration
- Ability to cope in a technically complex and fast-changing environment, and to respond calmly and rationally to changing aspirations in a deadline-driven situation.
- Must have experience in architecting Hybrid Cloud solution and exposure to Software Defined Datacentre
- Industry certification with Hybrid Cloud / Hyperscaler platforms

## **Personal**

Besides the professional qualifications of the candidates we place great importance in addition to various forms personality profile. These include:

- Highly organized and able to multi-task.
- Self-driven and proactive nature.
- Excellent communication and interpersonal skills.
- Demonstrate leadership qualities.
- Patient and active listener.
