Job summary Calling all TIG Welders! Key skills required for this role TIG Welder, Aerospace
Important TIG Welder, Aerospace **Job description** Job Title: TIG Welder Fabricator Salary: £16-20 per hour
Company Overview: Join a reputable and long-standing business renowned for its precision workmanship and commitment to quality. Our company specializes in working to exceptionally fine tolerances, prioritizing quality craftsmanship over volume production. With a steady hand and meticulous attention to detail, we consistently deliver work to the highest standards, earning repeat business and maintaining our position as a leader in our industry.
Role & Responsibilities: As a TIG Welder Fabricator, you will play a pivotal role in our production process, utilizing your expertise to fabricate and weld components to exact specifications. Your ability to work with materials as thin as 0.8mm and your strong background in industries such as aerospace or defense will be essential to excel in this role. Key responsibilities include:
Confidently working with materials as thin as 0.8mm, demonstrating precision and skill in TIG welding. Utilizing your experience in aerospace, defense, or a similar industry to meet the standards of our clientele.
Performing fabrication tasks with the same proficiency as welding, ensuring seamless integration of components.
Interpreting and working from technical drawings to produce accurate and precise components.
Demonstrating proficiency in working with stainless steel and aluminum, delivering high-quality results.
Experience in brazing would be desirable
Qualifications Proven experience as a TIG Welder Fabricator, preferably in industries with high precision requirements. Strong proficiency in TIG welding techniques, with the ability to work with materials as thin as 0.8mm. Background in aerospace, defense, or a similar industry is highly advantageous. Demonstrated ability to

fabricate components with precision and accuracy. Proficiency in reading and interpreting technical drawings. Experience working with stainless steel and aluminum is essential. Brazing experience would be beneficial but not mandatory. Excellent attention to detail, with a commitment to delivering quality craftsmanship. Share manages this role Matchtech is a STEM Recruitment Specialist, with over 35 years' experience
