Job title – Validation Specialist

Location – Dalry, United Kingdom

Job model – On Site

We have 1 permanent vacancy within the Quality Department working dayshift.

dsm-firmenich is the world's leading supplier of vitamins, carotenoids and other fine chemicals to the feed, food, pharmaceutical and personal care industries. This role sits within the Animal Nutrition and Health business unit, generating the nutritional premix and additives to mix into animal feed.

At dsm-firmenich, being a force for good is not optional. Diversity, Equity & Inclusion is a shared responsibility woven into our daily work, benefiting to our People, Customers & Communities and driving business value. Equal access to opportunities is a given, belonging is a shared feeling, authenticity is celebrated.

Your key responsibilities

Leadership role within the Quality Department responsible for the management and co-ordination of the site cGMP validation activities.

Support validation activity during design, installation & commissioning of new equipment, processes, packaging lines & facilities and utilities.

Ensure the validated status of site facilities, i.e., Equipment, processes, CSV and utilities is complete and compliant with internal local and corporate procedures, relevant regulatory requirements and industry guidance.

Authoring, reviewing, executing and maintaining validation documentation including site Validation Master Plan and Site Validation Strategy.

Support Production departments in validation activities for processes and equipment

Preparation and management of validation plans, protocols and reports.

Support and coordinate with corporate validation team.

Supporting external audits including customer and regulatory inspections, presenting and explaining relevant validation information to inspectors/auditors.

Execute validation protocols and drive to completion any CAPA associated with non-conformances raised.

Use quality risk management tools (e.g., FMEA, System Impact Assessments) to ensure that risks are appropriately identified, documented and managed.

Ensure product quality through robust testing and process monitoring including the use of statistical techniques.

Support Cleaning, Utilities and Computer System Validation.

We bring

A supportive environment where you're empowered to grow and share your ideas.

An inclusive and multicultural team with respect for everyone.

A dynamic work environment with many challenges that give you the possibility to work autonomously and with a team in finding the right solutions.

You bring

Successful candidates should have a degree in a relevant science or engineering discipline with a minimum 5 years of validation and qualification experience in a cGMP regulated life science industry, i.e., Pharmaceutical, API or Bio-tech.

Other essential behaviours are excellent communication and organisational skills, and the ability to work independently & within cross functional teams.

The application process
