

## Voice Core Planner - Signalling

[Apply Now](#)

Company: CONNECT44

Location: United Kingdom

Category: life-physical-and-social-science

- Determine and lead on all aspects of signalling design configuration to ensure that VMO2 has a robust, cost-effective signalling network of high integrity to support the growth of the existing GSM/GPRS/3G/4G/5G networks.
- Support the Signalling Design, Architecture and Planning manager in evolving the architecture to support 2G/3G/4G & 5G networks.
- Capacity planning and performance monitoring and management of the VMO2 signalling network.
- Production of integration plans for the introduction of new nodes and platforms.
- Maintaining the Magnet asset database in order to ensure data integrity for MTP, SCCP, link monitoring and signalling devices.
- Maintenance and control of the LLD documentation to ensure data integrity.
- Produce structural, functional and physical design documents for Network elements.
- Produce plans to establish signalling architecture changes.
- Supplier liaison to identify element functionality.
- Dimension signalling/IP elements to meet forecast demand.
- Evaluate any signalling anomalies and design/plan resolutions to maintain signalling network integrity.
- Represent the signalling team for new company initiatives and identify impacted areas.
- Identify and assess impact of new protocol standards and produce Statement of Requirements for vendors to meet network evolution requirements.
- Review supplier Statement of Compliance documents.

·Produce signalling impact assessments.

·Identify and maintain a database of the relevant protocol versions currently in use within the O2 SS7 network.

Produce high level call flows for 2G/3G/4G & 5G services.
