Company: Orange Business Services

Location: United Kingdom

Category: other-general

Some highlights

Being part of an international company yet with local presence

Build a safer digital society together with us

Working as a VP Global Product Manager

We are seeking a highly experienced and strategic Vice-President (VP) Global Product Manager to join Technology & Marketing division in the cyber security industry and lead Global Product Management department in charge of our product portfolio.

As the VP Global Product Manager, you will have a central role in Technology and Marketing division, accountable for driving differentiation of Orange Cyberdefense through innovative services, aiming for EBITDA and revenue for Orange Cyberdefense, and customer success. You will work closely with countries, with the Global Operations division, and cross-functional teams to define product strategies, identify market opportunities, and ensure the successful execution of our product roadmap.

Key Responsibilities

Develop and innovate on global cyber-security managed services for all stakeholders aiming at EBITDA and revenue

Hold the decision-making authority for product lifecycle and the global portfolio: global product management, policy and portfolio management, until the operational delivery requirements, together with and aligning with countries needs

Ensuring differentiation of the managed services by leveraging the CTO Office / Innovation

Product (service) evolution and management is the set of ongoing activities needed to maintain and grow an existing product or service throughout its life cycle. These activities include continued innovation and evolution while managing complex portfolios in the face of constant disruption.

Provide leadership and mentorship to the product management team, fostering a culture of innovation, collaboration, and excellence.

What we expect of you

Minimum of 12 years of experience in Product Management, preferably in the cyber security industry.

Demonstrated experience within Cybersecurity

Demonstrated experience in successfully launching and managing global products.

Strong business acumen and ability to drive revenue growth through effective product positioning and go-to-market strategies.

Proven ability to manage multiple projects simultaneously and meet tight deadlines.

Strong problem-solving skills and ability to make data-driven decisions.

Broad understanding across multiple different areas of cybersecurity (cloud, application architecture, Identity and Access Management, network security, endpoint security, advanced SOC deliveries).

Skills in cybersecurity regulations and standards.

Strong focus on user experience design to ensure product usability and customer satisfaction.

Emphasis on continuous learning and adaptability to keep pace with rapid technological advancements.

Excellent leadership and communication skills, with the ability to influence and collaborate with cross-functional teams. Expertise in remote collaboration tools and methodologies, reflecting the global and often remote nature of modern teams.

Excellent written and oral, professional level English

contract

Regular

Hybrid work
